

ISISL

Host Console · For Global Property promoters

Manage owners' properties from one console

Listings, reservations, calendars, pricing, availability, and guest messages—the operating tool promoters use to run stays on behalf of property owners.

In this deck

- 01 Your role in the console
- 02 Home — daily ops
- 03 Reservations
- 04 Stay calendar
- 05 Reservation detail
- 06 Listings
- 07 Pricing
- 08 Availability
- 09 Inbox
- 10 How you start

Built for multi-property operators · Phone-ready web console

HOW PROMOTERS USE ISISEL

You run the properties. Owners trust you with the stays.

Global Property promoters use the Host Console as their management desk: add owners' listings, answer reservation requests, keep calendars accurate, set rates, and message guests—from a laptop or a phone.

Owners

Hotels, villas, and portfolios you represent

You

Operate listings and guest requests day to day

Console

One place for every property under management

Guests

Discover stays and request dates on Isisel

IN THE CONSOLE YOU

- 01 Publish and update owners' listings
- 02 Respond to reservation requests
- 03 Watch occupancy across the portfolio
- 04 Set nightly, weekly, and monthly rates
- 05 Block or open nights on the calendar
- 06 Message guests next to each booking

Same console on desktop and mobile.

TOOL 01 · HOME

Your morning brief across every owner

Open the console once. See which properties need you today.

What you do here

- Live counts: arrivals, departures, in-stay, and needs-you
- Incoming requests waiting for your response
- Upcoming arrivals so you prep stays before guests land

You operate the portfolio—owners stay informed; you run the day.

TOOL 02 · RESERVATIONS

Handle every booking for the owners you represent

Search, filter, and act on stays without hunting through inboxes.

What you do here

- Find a stay by guest name or reference number
- Track statuses from awaiting payment to confirmed
- Resend confirmation, modify dates, unlist, or cancel when needed

One reservations desk for all the properties under your care.

TOOL 03 · STAY CALENDAR

See the whole portfolio on one timeline

Properties as rows, dates as columns—built for multi-owner management.

What you do here

- Scan occupancy across villas, apartments, and houses at once
- Color-coded status: upcoming, in stay, pending, modified, cancelled
- Jump date ranges and search by stay or guest

Your operating calendar—not a spreadsheet per owner.

TOOL 04 · RESERVATION DETAIL

Pull guest and stay details in one tap

When an owner asks about a booking, you already have the answer.

What you do here

- Guest contact: email and WhatsApp ready to use
- Dates, nights, status, booking date, and total
- Open or modify the reservation without leaving the phone

Front-desk clarity for every stay you manage.

TOOL 05 · LISTINGS

Manage the full property roster

Every listing you run for owners lives under one promoter account.

What you do here

- See live vs in-review status across the portfolio
- Open listing pages, create reservations, adjust rates
- Jump to each property's calendar or remove a listing

Scale from a few stays to a working portfolio—same console.

TOOL 06 · PRICING

Set rates for each owner's property

Nightly, weekly, and monthly pricing you control on their behalf.

What you do here

- Enter USD rates by period; leave unused periods empty
- Keep weekly and monthly offers consistent with owner policy
- Preview how the listing will read to guests before you save

Pricing is part of your management job—done in-product.

The screenshot shows the ISISEL mobile app interface. At the top, there's a status bar with the time 12:04, language options (EN, FR), and a 'View site' link. Below this is a navigation bar with 'Home', 'Reservations' (with a red notification badge), and 'Stay calendar'. The main content area is titled 'Listings' and shows a card for 'Stone Town Courtyard House' in Zanzibar, Tanzania. The card is labeled 'PRICING'. Below the card, there's a text prompt: 'Set prices in USD for Stone Town Courtyard House. Leave a field empty if you do not offer that period. At least one rate is required.' The pricing section has three input fields: 'NIGHTLY' (Per night stays) with a value of '\$ 1', 'WEEKLY' (Week-long stays) with a value of '\$ 1', and 'MONTHLY' (28+ night stays) with a value of '\$ Not offered'. At the bottom, there's a 'Listing preview' section showing 'From \$1/ night' and 'Example 3-night stay: \$3 (3 nights)'.

PRICING

Stone Town Courtyard House

📍 Zanzibar, Tanzania

Set prices in USD for Stone Town Courtyard House. Leave a field empty if you do not offer that period. At least one rate is required.

NIGHTLY Per night stays

\$ 1

WEEKLY Week-long stays

\$ 1

MONTHLY 28+ night stays

\$ Not offered

Listing preview

From \$1/ night

Example 3-night stay: \$3 (3 nights)

TOOL 07 · AVAILABILITY

Block and open nights for each listing

Protect owner calendars: maintenance, owner stays, and custom rates.

What you do here

- Select a range, then Block, Custom \$, or Unlock
- Read available, blocked, booked, and custom-priced nights at a glance
- Save to publish inventory updates to the listing

Inventory control stays with you—the operator of the property.

TOOL 08 · INBOX

Message guests for the properties you manage

Keep owner-guest communication in the console, not scattered chats.

What you do here

- Filter All, Unread, and Sent threads
- See guest identity, subject, and timestamp per message
- Reply or delete without leaving the host console

You are the contact point—messages follow the booking.

GET ON THE CONSOLE

Start managing owners' properties in Isisel today.

- 01 Create your host / operator account
- 02 Add the properties you manage for owners
- 03 Run reservations, calendars, rates, and inbox from one place
