

HOST CONSOLE

Your stays. Your rules. *One phone.*

A host console built for African vacation rentals — reservations, calendars, listings, and creator partnerships, without the platform tax.

0% Isisel commission for founding hosts — keep the night.

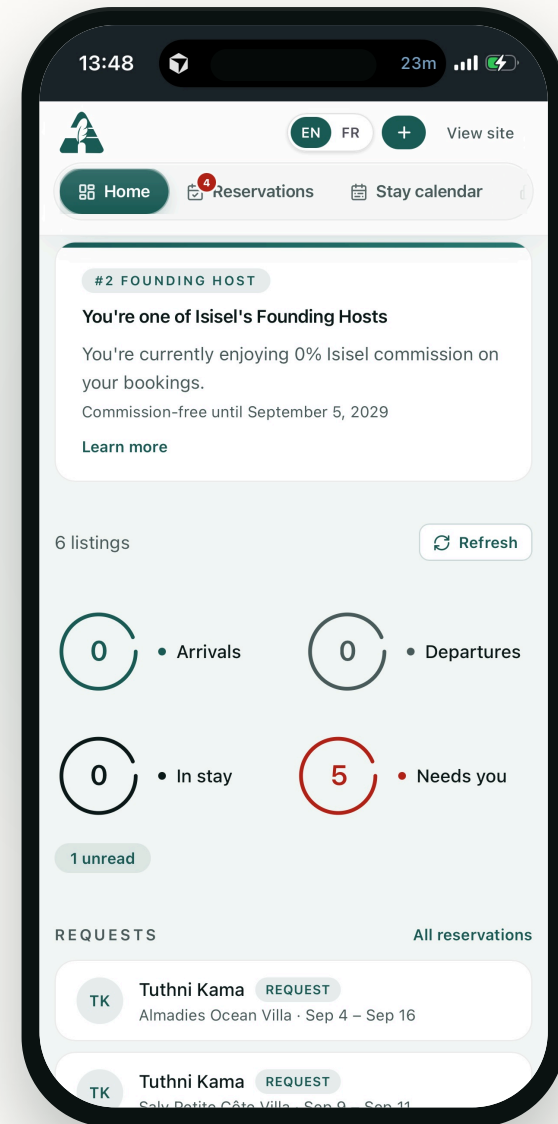

FOUNDING HOSTS

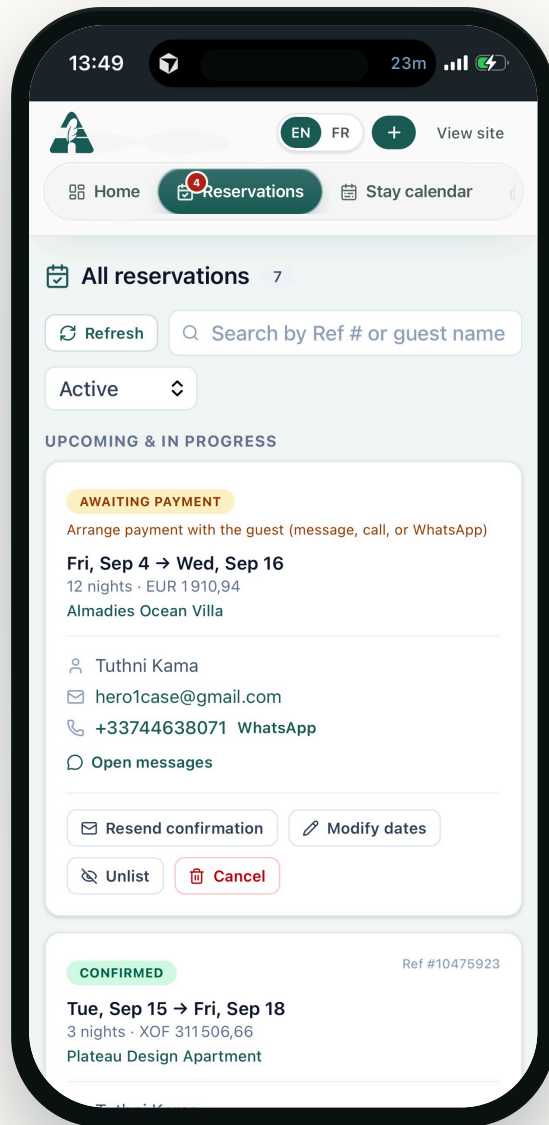

Keep **100%** of the night

Early hosts are not inventory on a global board. You are a founding partner — and the console shows it.

- 01 **0% Isisel commission** on your bookings while the founding window runs.
- 02 **Needs you** counts — see what requires action before anything else.
- 03 **Requests in one feed** — guest, dates, property, ready to answer.

RESERVATIONS

Every booking under *your* thumb

Search by guest or reference. Filter what is active. Act without opening five apps.

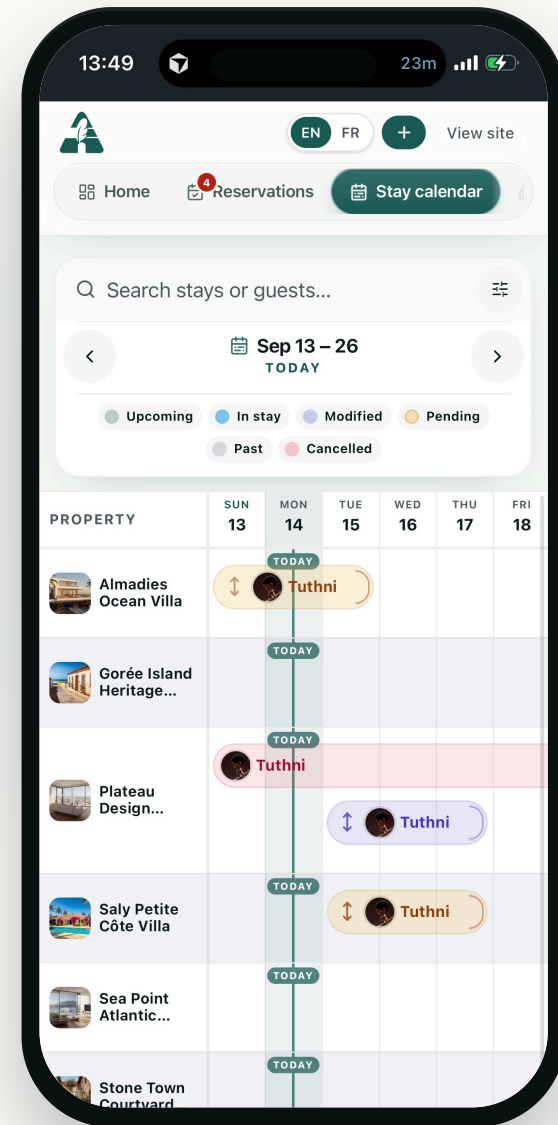

- 01 **Clear status** — awaiting payment, confirmed, done.
- 02 **WhatsApp, call, message** — reach the guest from the card.
- 03 **Resend · modify · unlist · cancel** — full control, on mobile.
- 04 **Multi-currency** — EUR, XOF, and more, shown cleanly.

STAY CALENDAR

All properties. *One timeline.*

See who is coming, who is in stay, and what is pending — across every listing you run.

- 01 **Color-coded stays** — upcoming, in stay, pending, modified, past.
- 02 **Guest on the bar** — names and faces on the timeline.
- 03 **Search stays or guests** — find anything in seconds.

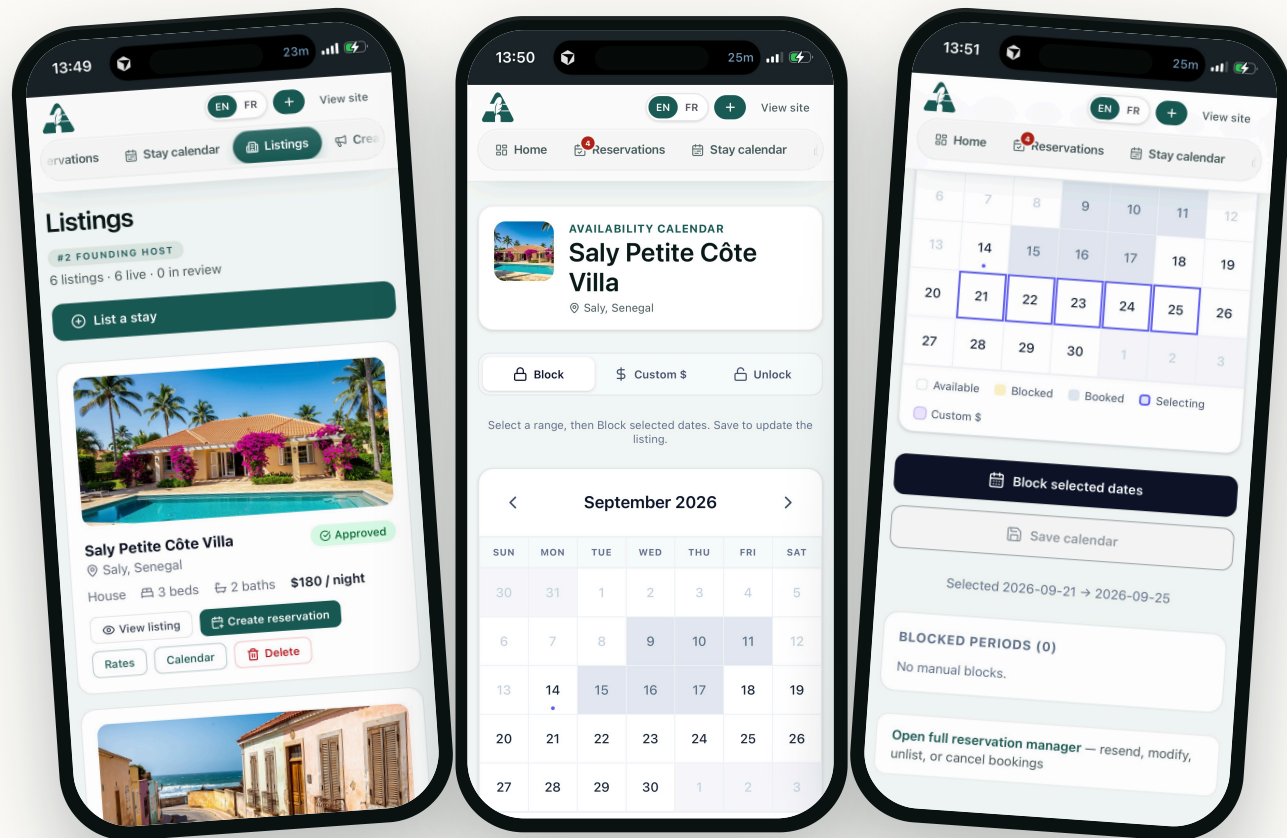

LISTINGS & AVAILABILITY

Inventory you can *feel*

Beautiful listing cards. Instant actions. A calendar that blocks, unlocks, and prices the way you work.

- 01 **List a stay** in a tap — live, in review, at a glance.
- 02 **Create reservation** for walk-ins and direct guests.
- 03 **Block · custom \$ · unlock** — select a range, update the market.

CREATOR PARTNERSHIPS

Grow stays with *creators*

Assign promo codes per listing. Track attributed bookings. See commission you owe — separate from Isisel's platform fee.

- 01 **Host-funded marketing** you control — never mixed with platform fees.
- 02 **Active codes & attributed stays** — ROI you can read.
