

Creator Partnership *Influencer Commission* System

Product Specification

Isisel partners with creators and influencers to generate **qualified bookings**, compensate as a **host-funded marketing expense** — never by overloading Isisel’s platform fee — and create attribution, ledger, dashboards, and payouts end to end.

Executive Summary

Isisel is a live African vacation-rentals marketplace. Creator partnerships are the near-term **demand and trust engine**: influencers bring audiences; hosts pay a creator share **only when a qualifying booking completes**.

GOVERNING PRINCIPLE
Creator commission ≠ Isisel platform commission. Isisel does not charge hosts a standard platform commission for this creator marketing model. Hosts only share a percentage when they **voluntarily opt in** and the creator generates a qualifying booking. Creator pay is a marketing expense on a dedicated ledger — never reuse `pricingSnapshot.platformFee` .

3 tracks
Fixed fee · Hosted stay · Performance %

Opt-in
Hosts choose campaign participation

Post-stay
Finalize commission after checkout past

CRM live
`/influencers` + `/ops/marketing/creators`

EXISTING TODAY
Funnel & ops inbox

Public creator landing, lead capture, funnel events, and ops CRM stages — no promo codes, no creator payout ledger yet.

THIS SPECIFICATION
Commercial + product system

Compensation models, attribution, commission engine, dashboards, fraud controls, MVP and Phase 2 — ready for partners and build.

Isisel Business Model

Isisel connects travellers with vetted stays across Africa. Guests book; hosts manage inventory from `/host` . Today's checkout fee engine uses `PLATFORM_COMMISSION_RATE = 0.07` stored as `pricingSnapshot.platformFee` / `commissionAmount` (Founding Host waivers possible). That ledger stays independent of creator marketing.

LAYER	ROLE	STATUS
Marketplace	Listings, search, booking, payments	EXISTING
Host console	<code>/host</code> calendar, reservations, listings	EXISTING
Ops console	<code>/ops</code> including marketing / creators	EXISTING
Creator CRM	Leads from <code>/influencers</code> → <code>CreatorLead</code>	EXISTING
Platform fee engine	<code>propertyRates.js</code> — guest checkout fee	EXISTING
Promo codes + host opt-in	Attribution + voluntary host marketing share	PROPOSED
CreatorCommission	Separate ledger — never reuse <code>platformFee</code>	PROPOSED

Booking statuses today: `pending` | `confirmed` | `cancelled` . No promo codes in production yet. Creator pay must not mutate or reuse `platformFee` .

Why Creator Partnerships

TRUST
Audience belief

Creators convert diaspora and travel audiences that paid ads struggle to reach authentically.

SUPPLY
Host introductions

Creators open doors to owners — the “bring a host, take a stay” path already pitched.

DEMAND
Qualifying bookings

Promo codes attribute stays to creators; hosts fund commission only on performance.

GOVERNING PRINCIPLE
Creator commission ≠ Isisel platform commission. Hosts only pay when they opt in and a creator generates a qualifying booking. Platform fee rules (including Founding Host waivers) remain untouched by creator share.

SECTION 05

Creator Compensation Model

Three configurable tracks. Campaigns may stack fixed fee, hosted stay, and performance commission under written terms.

TRACK	TRIGGER	CREATOR RECEIVES	WHO BEARS COST	ISISL
Fixed fee	Contract / content live	Configurable cash (e.g. €200)	Campaign budget (Isisel or co-funded)	Ops-configured; not platformFee
Hosted stay	Partnership / intro terms	Complimentary nights (1–2 typical)	Host inventory and/or Isisel	Facilitation; stay COGS separate
Performance	Qualifying attributed booking completes	% of accommodation base (e.g. 10%)	Opted-in host marketing expense	Platform fee separate; €0 skim of creator %

- Qualifying booking:** attributed, host opted in, not cancelled, checkout past, fraud checks clear.
- Rate:** per CreatorCampaign / property assignment (illustrative default 10% of accommodationBase).
- Currency:** follow booking pricingSnapshot.currency ; settle on agreed payout rail.

SECTION 06

Hosted Stay Model

Marketing pitch already exists (kama-mvp-influencer-stay): creator introduces an owner; when that owner becomes an approved host, Isisel coordinates **two complimentary nights**.

RULES

- Not transferable for cash
- Unlocked only when host is approved
- Dates follow host calendar
- No mandatory post — content optional

OPS LINKAGE

EXISTING Lead stages: new → contacted → discussing → proposed → negotiating → active → completed / not_fit .

PROPOSED Attach “stay voucher” fulfillment record to CreatorLead / campaign when active.

SECTION 07

Influencer Promo Code Model

EXISTING

No promo codes in production today.

PROPOSED

Unique codes per creator/campaign.

FIELD	INTENT
<code>code</code>	Human-readable token (e.g. <code>BINTA10</code>)
<code>creatorId</code> / lead ref	Attribution owner
<code>rateBps</code> or %	Creator share of accommodation base
<code>hostScope</code>	All hosts, property set, or campaign hosts
<code>validFrom</code> / <code>validTo</code>	Campaign window
<code>status</code>	draft active paused expired

GOVERNING PRINCIPLE

Hosts only pay when the creator generates a qualifying booking. A code applied without a completed stay creates **no** host liability and **no** creator accrual.

SECTION 08

Host Economics

Illustrative night when host has opted into a 10% creator campaign. Guest pays €250 accommodation.

LINE	AMOUNT	NOTES
Guest pays (accommodation)	€250	Per night illustration
Creator commission (10%)	€25	Host marketing expense; separate ledger
Host net (before other fees)	€225	€250 – €25
Isisel from creator share	€0	Creator % is not an Isisel take rate
Isisel platform fee	~7% default	Independent — <code>PLATFORM_COMMISSION_RATE</code>

When both platform fee and creator share apply, compute both independently from the snapshot; never reduce `platformFee` to “fund” the creator. Non-opted-in hosts never owe creator share.

SECTION 09

Booking Flows — Standard vs Influencer

Standard booking

Guest → Search / listing
→ Checkout (no code)
→ Booking pending|confirmed
→ Stay → checkout past

Host → Calendar / payout (platform rules)

Isisel→ platformFee only

Influencer booking

Guest → Listing + promo code
→ Attribution on Booking
→ Booking pending|confirmed
→ Stay → checkout past

Engine→ CreatorCommission accrued

Host → Sees creator line in economics

Isisel→ platformFee + ledger ops

Commission Flow (Post-Stay)

GOVERNING PRINCIPLE
Finalize after stay (checkout date past). Do not pay on `pending` . Cancelled or unlisted stays that never complete do not create payable commissions.

Journeys — Creator, Host, Guest & Isisel Ops

11 · CREATOR

1. Discovers `/influencers` , submits lead
2. Ops stages CRM → active agreement
3. Receives code / stay voucher
4. Publishes content; tracks dashboard KPIs
5. Receives payout after qualifying stays

12 · HOST

1. Opts into campaign / property assignment
2. Sees transparent creator line on attributed stays
3. Pays creator share only on qualifying completions
4. Platform fee path unchanged vs normal bookings

13 · GUEST

1. Follows creator link / enters code
2. Books normally on isisel.com
3. Experiences stay; no commission UI required

13B · ISISEL OPS

1. Triage leads at `/ops/marketing/creators`
2. Activate campaigns, codes, host scopes
3. Monitor fraud queues; approve payouts
4. Reconcile CreatorCommission vs bookings

Creator Dashboard — Wireframe

PROPOSED Authenticated creator portal (or read-only ops share link for MVP).

SECTION 17

Database Architecture

Existing entities

ENTITY	RELEVANCE	
User	Hosts, guests, ops identities	EXISTING
Property	Listing inventory; host ownership	EXISTING
Booking	Statuses pending confirmed cancelled ; pricingSnapshot incl. platformFee	EXISTING
CreatorLead	CRM from /influencers	EXISTING
CreatorFunnelEvent	Funnel analytics	EXISTING

Proposed entities

ENTITY	PURPOSE
CreatorProfile	Linked user/lead, payout details, status
CreatorCampaign	Fixed fee, stay nights, rate, window, deliverables
CreatorPromoCode	Code ↔ campaign ↔ creator (attribution-first)
CreatorPropertyAssignment	Host opt-in per property / campaign
Booking.creatorAttribution	Code, profile, campaign, rate snapshot
CreatorCommission	Separate ledger — never reuse platformFee
CreatorPayout / HostedStay	Batch settlement · stay fulfillment

Attribution lives on Booking ; financial truth for creator pay lives only in CreatorCommission . Founding Host / commissionOverride affect only the platform fee ledger.

SECTION 18

Technical Architecture / Integration Points

SURFACE	INTEGRATION	
/influencers	Public funnel → POST /api/creators/leads	EXISTING
/ops/marketing/creators	Ops CRM panel	EXISTING
/host	Show creator economics on stays	PROPOSED
Checkout	Accept promo code; stamp attribution	PROPOSED
Confirm booking	Preserve attribution; do not alter platformFee math for creator	PROPOSED
Cron / job	Post-checkout commission finalization	PROPOSED
Notify	Extend Resend templates for payout / code events	PROPOSED

Checkout → Booking(+attribution) → payments/webhook
→ Host calendar (existing)
→ Nightly job: finalize commissions
→ Ops payout UI → rail

SECTION 19

Commission Engine

- **Inputs:** booking snapshot (accommodation base, nights, currency), campaign rate, attribution, stay completion, fraud flags.
- **Output:** one `CreatorCommission` row per qualifying booking (idempotent on `bookingId`).
- **Formula (default):** `amount = accommodationBase × creatorRate` (e.g. 10%).
- **Non-goals:** changing guest total solely to fund creator; writing creator amounts into `platformFee`.
- **Reversals:** if booking later cancelled post-accrual but pre-pay, mark `reversed`; after pay, ops clawback process.

GOVERNING PRINCIPLE

Creator commission ≠/is platform commission. The engine may *read* `pricingSnapshot` for bases; it must *write* only to `CreatorCommission`.

SECTION 20

Fraud Prevention

ATTRIBUTION INTEGRITY

- Code required at checkout (or signed deep link)
- Reject self-booking (creator = guest)
- Velocity caps per code / IP / device
- Host-creator collusion review queue

PAYOUT GATES

- Pay only post-checkout + confirmed
- Manual approve above threshold
- Hold on dispute / chargeback
- Audit log on status transitions

SECTION 21

Payout Lifecycle Statuses

STATUS	MEANING
<code>pending_stay</code>	Attributed booking exists; checkout not yet past
<code>accrued</code>	Stay completed; amount computed; awaiting review
<code>on_hold</code>	Fraud / dispute hold
<code>approved</code>	Cleared for inclusion in payout batch
<code>payable</code>	In open payout batch
<code>paid</code>	Funds sent; rail reference stored
<code>reversed</code>	Voided before or after pay (clawback)

SECTION 22

Campaign Analytics

CTR Link / code engagement	CVR Click → booking	GMV Attributed accommodation	CAC% Creator cost / GMV
--------------------------------------	-------------------------------	--	-----------------------------------

Ops views: per creator, per campaign, per host, cohort by content drop date. Funnel events (**EXISTING** `CreatorFunnelEvent`) feed top-of-funnel; booking attribution feeds revenue.

SECTION 23

Creator CAC

Treat total creator marketing cost (fixed + stay COGS + performance) as CAC against attributed GBV.

METRIC	BINTA-STYLE EXAMPLE
Attributed GBV (accommodation)	€5,000 (20 × €250)
Performance commissions (10%)	€500
Fixed fee + hosted stay COGS	€200 + €150 = €350
Total creator marketing cost	€850
Creator CAC	17% (€850 / €5,000)
Isisel platform fee (separate)	Per snapshot — not in the 17%

17% is an illustrative working example for partner conversations, not a committed rate card. CAC efficiency improves as attributed GBV scales against fixed components.

SECTION 24

Example — Binta Lola Camara

Flagship partnership illustration for planning — not a live contract in code.

PACKAGE TERM	VALUE
Creator	Binta Lola Camara
Promo code	<code>BINTA</code>
Fixed fee	€200
Hosted stay	1 night (~€150 COGS)
Performance	10% of accommodation base · 90 days
Host participation	Opt-in only

PER NIGHT (OPTED-IN HOST)	AMOUNT
Nightly accommodation	€250
Creator commission (10%)	€25
Host net (pre platform fee)	€225
Isisel from creator share	€0

CAMPAIGN ROLL-UP (20 BOOKINGS × €250)	AMOUNT
Attributed GBV	€5,000
Performance commissions (10%)	€500
Fixed fee + stay COGS	€350
Total creator marketing cost	€850
Creator cash (€200 + €500)	€700 (+ stay)
Creator CAC / GBV	17%

GOVERNING PRINCIPLE

Hosts only pay the €25/night when Binta generates a qualifying booking on an opted-in property. No booking → no performance commission. Platform fee remains Isisel’s separate line.

SECTION 25

Campaign Economics

HOST VIEW

Opt-in only. Predictable share on attributed demand. Platform fee path unchanged vs non-creator bookings.

ISISSEL VIEW

Platform fee intact. Growth without coercive host take. Ops cost = CRM + ledger + payouts.

ATTRIBUTED GBV	COMMISSION 10%	FIXED+STAY	TOTAL CAC	CAC/GBV
€2,000	€200	€350	€550	27.5%
€5,000	€500	€350	€850	17.0%
€10,000	€1,000	€350	€1,350	13.5%

	PLATFORM FEE (EXISTING)	CREATOR COMMISSION (PROPOSED)
Purpose	Marketplace checkout fee	Marketing attribution reward
Default	7%	Campaign-configured (e.g. 10%)
Storage	pricingSnapshot.platformFee	CreatorCommission
Host mandatory?	Checkout fee policy	Opt-in only
Finalized	At booking fee calc	After stay

Legal / Commercial Considerations

- **Written agreement** per creator/campaign: rate, scope, content expectations, payout schedule, termination.
- **IP & brand:** existing legal content covers creator materials; commercial revenue share only via agreement.
- **Tax / KYC:** collect payout identity where required; creators responsible for their tax status.
- **Host consent:** campaign terms disclosed before attributed bookings bind economics.
- **Disputes:** chargebacks freeze payable rows; ops playbook for reversals.
- **No exclusivity by default** unless negotiated.

MVP Scope

IN	OUT (LATER)
Promo codes + booking attribution CreatorCommission ledger + post-stay job Ops approve / payout mark-paid Host economics line on reservation Basic creator summary (ops or simple portal)	Full self-serve creator app Multi-currency auto FX Instant payouts Marketplace of creators for hosts Automated collusion ML

Build on existing CRM — do not rebuild `/influencers` as a second marketing site.

Phase 2

PRODUCT • Creator self-serve dashboard • Deep links + QR • Tiered rates	MONEY • Payout rails API • Multi-currency settle • Host invoicing export	GROWTH • A/B creative kits • Cohort LTV • Host opt-in marketplace
--	---	--

Future Creator Marketplace

- Longer horizon: hosts discover vetted creators, propose collaborations, and fund campaigns inside Isisel — with the same ledger rules (separate commission, post-stay finalize, transparent host economics).
- Creator profiles with performance badges (anonymized CAC bands)
 - Structured briefs and escrowed campaign budgets
 - Isisel as trust & settlement layer — not a generic influencer SaaS clone

Conclusion

Partner with creators. Protect the fee. Pay on performance.

Isisel already has the public funnel and ops CRM. This system adds **host opt-in, attribution, a CreatorCommission ledger,** and clear economics so influencers earn when they deliver stays — without confusing creator pay with platform

commission.

GOVERNING PRINCIPLE — FINAL REMINDER

Creator commission $\neq$ Isisel platform commission. Isisel does not charge hosts a standard platform commission for this creator marketing model. Hosts only share when they opt in and a creator generates a qualifying booking. Finalize after stay. Never reuse `platformFee` for creator pay.

[www.isisel.com /influencers](https://www.isisel.com/influencers) · Ops </ops/marketing/creators>
