

ISISL

Partner brief for Global Property promoters

Give property owners a channel they will actually run

Use the live Host Console as proof: founding hosts keep the night, guests request stays,
and operators manage portfolios from a phone.

In this deck

- 01 Why owners say yes
- 02 Home — day-of ops
- 03 Reservations — control
- 04 Stay calendar — portfolio
- 05 Reservation detail
- 06 Listings — scale
- 07 Pricing — keep the night
- 08 Availability — inventory
- 09 Inbox — guest thread
- 10 Close the intro

THE OFFER YOU PROMOTE

Another channel. More of the night kept.

Isisel sits beside Airbnb and Booking.com. Guests request dates. Founding hosts list without traditional platform commission on the night.

Reach

Put hotels, villas, and managed portfolios in front of travellers looking for African stays.

Revenue

Founding hosts keep 100% of the night—no traditional booking-platform cut while the catalogue grows.

Control

Requests you approve. Listings, calendar, pricing, and inbox in one mobile console.

FOUNDING HOST LINE

Keep the night. We take none.

Illustrative: a €500 stay on a traditional OTA loses a percentage to commission. On Isisel, founding hosts retain the night's value.

TRADITIONAL PLATFORM

Stay priced → % commission
→ less revenue retained

ISISEL · FOUNDING HOSTS

Stay priced → no night cut
→ more of that night kept

Commercial terms at Isisel's discretion; may evolve.

PROOF 01 · HOME

Owners run the day from one screen

Show partners a live ops view—not a brochure site.

Your talking points

- Founding Host status and commission-free window, visible in-product
- Arrivals, departures, in-stay, and needs-you—actionable at a glance
- Requests and upcoming arrivals so nothing sits unanswered

Pitch: “Your properties stay under your control—Isisl surfaces what needs you today.”

PROOF 02 · RESERVATIONS

Nothing books behind their back

Owners approve and manage requests—the control argument that closes deals.

Your talking points

- Search by guest or reference; filter Active stays
- Clear statuses: Awaiting payment, Confirmed, and more
- Guest contact, messaging, modify, unlist, cancel—tools operators expect

Pitch: “Guests request. The owner decides. Same standard as a serious channel.”

PROOF 03 · STAY CALENDAR

A portfolio calendar, not a spreadsheet

Multi-property promoters need one timeline across every stay they represent.

Your talking points

- Properties as rows, dates as columns, Today marked
- Status colors: upcoming, in stay, modified, pending, past, cancelled
- Search stays or guests across the range

Pitch: “One calendar for the whole collection—villas, apartments, houses.”

PROOF 04 · RESERVATION DETAIL

Guest context ready for a call

When an owner asks “what does a booking look like?”, open this.

Your talking points

- Guest profile with email and WhatsApp
- Property, nights, check-in/out, status, total
- View or modify reservation in two taps

Pitch: “Professional stay handling—without leaving the phone.”

PROOF 05 · LISTINGS

Every property under one host account

Built for promoters and managers who bring more than a single listing.

Your talking points

- Portfolio summary: live vs in review
- Photo, approval, location, beds, rate at a glance
- Create reservation, rates, calendar, delete—operator actions

Pitch: “Add the portfolio. Manage it as one business.”

PROOF 06 · PRICING

They set the rate. They keep the night.

Pair this screen with the founding-host commercial line.

Your talking points

- Nightly, weekly, and monthly (28+) rates in USD
- Leave a period empty if not offered
- Live preview of how the listing will read to guests

Pitch: “You price it. Founding hosts keep 100% of the night on Isisel.”

PRICING

Stone Town Courtyard House

📍 Zanzibar, Tanzania

Set prices in USD for Stone Town Courtyard House. Leave a field empty if you do not offer that period. At least one rate is required.

NIGHTLY

Per night stays

\$ 1

WEEKLY

Week-long stays

\$ 1

MONTHLY

28+ night stays

\$ Not offered

Listing preview

From \$1/ night

Example 3-night stay: \$3 (3 nights)

PROOF 07 · AVAILABILITY

Inventory stays in their hands

Block, unlock, or custom-price dates—no mystery blackouts.

Your talking points

- Select a range, then Block / Custom \$ / Unlock
- Legend for available, blocked, booked, selecting, custom \$
- Save updates the listing’s open inventory

Pitch: “Your calendar, your rules—Isisel respects blocked nights.”

PROOF 08 · INBOX

Messages next to the booking

Stop selling “just another WhatsApp thread.” Show a real inbox.

Your talking points

- Filter All / Unread / Sent
- Guest identity, subject, timestamp on every thread
- Reply and Delete without leaving the console

Pitch: “Guest conversation lives with the reservation—not lost in chat.”

NEXT STEP

Introduce the owner. Open the console. Close on control and the night.

- 01 Walk them through /business and founding-host terms
- 02 Show this deck's console screens on a phone call
- 03 Send them to host onboarding when they are ready
